

	Sanjivani Rural Educational Society's SANJIVANI COLLEGE OF ENGINEERING (An Autonomous Institution) Kopargaon – 423 603, Maharashtra.	ACAD-F-03
Academic Year: 2026-2027	Evaluation Rubrics for Project Topic Finalization	Revision : 00 Dated : 1/7/2026
Term – I	Department: Information Technology	Date of Preparation : 21/04/2026

Project Title: An Intelligent NLP System for Legal and Employment Document Risk Analysis with Multiplatform Delivery

Name of Project Members

1.Mr. More Sushant	UIT23M1096
2.Mr. Pawar Varun	UIT23M1108
3.Miss.Rahane Pratiksha	UIT23F1112
4.Miss.Shinde Payal	UIT23F1126

(with PRN no)

Criteria	Sub-Criteria	Excellent (10-8)	Good (7-6)	Average (5-4)	Poor (3-0)
Technical Complexity (30)	Innovation in design or algorithm	Highly innovative and original approach	Some unique elements, partly innovative	Basic logic, reused ideas	No novelty, copied design
	Complexity of architecture/integration	Advanced multi-layered system or integrated technologies	Moderate complexity and tool integration	Simple integration, few components	Single-component or minimal logic
	Use of tools and technologies	Uses cutting-edge tools, APIs, frameworks	Mix of standard and advanced tools	Limited to basic IDEs or software	Uses only prebuilt templates or basic software
Cost-Effectiveness (20)	Budget planning and justification	Well-documented cost sheet with clear justification	Mostly reasonable budget with few overspends	Partially planned, missing some justification	No budgeting or excessive cost
	Resource optimization & open-source usage	Uses affordable or open-source tools effectively	Mix of open-source and paid tools	Costlier tools used unnecessarily	Overuse of paid tools, no effort to optimize
Environmental Relevance & SDG (20)	Alignment with sustainability/environmental concerns	Directly addresses environmental goals (e.g., energy, waste, green tech)	Supports eco-friendly practices (e.g., paperless workflow)	Environmentally neutral, no harm	Negative impact or lack of awareness
	Contribution to SDGs or eco-innovation	Clearly mapped to SDGs/environmental impact	Indirect or partial SDG alignment	Not aligned with SDGs	Opposes or neglects sustainability

Criteria	Sub-Criteria	Excellent (10-8)	Good (7-6)	Average (5-4)	Poor (3-0)
Sustainability (30)	Scalability & modularity	Highly scalable, modular design ready for deployment	Partly scalable, some modular components	Limited scalability, hard to extend	Not scalable or modular
	Maintainability & documentation	Fully documented, easy to maintain and upgrade	Moderately documented, maintainable	Some documentation, lacks upgrade plan	No documentation, hard to maintain
	Future scope & long-term vision	Strong scope for reuse, commercialization, or social adoption	Some potential for reuse or extension	Limited future use, lacks long-term plan	Disposable one-time solution
