Project POs and PSOs Mapping Justification

**Revision: 00
Dated:**

Term – I / II

Department: Information Technology

Project Title	An Intelligent NLP System for Legal and Employment Document Risk Analysis with Multiplatform Delivery	
PO / PSO	Level	Justification
PO1	3	Applies Artificial Intelligence, Natural Language Processing, Machine Learning, Database Management, and Software Engineering concepts.
PO2	3	Analyses complex legal and employment documents to identify risks and important clauses.
PO3	3	Develops an end-to-end intelligent system including AI models, web application, and browser extension.
PO4	2	Evaluates AI model performance, risk classification accuracy, and document analysis effectiveness.
PO5	3	Uses React.js, FastAPI, Hugging Face, Llama 3, MongoDB, BeautifulSoup, GitHub, and cloud deployment tools.
PO6	2	Helps users understand legal agreements and promotes informed decision-making.
PO7	1	Supports paperless digital document analysis, reducing manual documentation.
PO8	2	Encourages ethical AI usage while respecting user privacy and data confidentiality.
PO9	2	Requires collaborative development among project team members.
PO10	2	Presents legal information in simple language through reports, dashboards, and summaries.
PO11	2	Involves project planning, scheduling, task management, and deployment within available resources.
PSO1	3	Applies programming, AI, NLP, and software engineering principles to solve real-world problems.
PSO2	3	Designs and develops intelligent web-based applications using modern technologies and databases.
PSO3	2	Integrates emerging technologies such as Large Language Models, Machine Learning, and cloud deployment to build innovative software solutions.
